# Free API Moscow Stock Exchange (MOEX) in Google Sheets

Data Mining, Algorithms, API, Google API, Finance in IT

Last year the number of private investors at Moscow Stock Exchange (MOEX) has doubled and reached 3.86 million: about 1.9 million people have opened accounts at MOEX in 2019. The Saint Petersburg Stock Exchange which specializes in trading of foreign company shares has seen its accounts increase three times from 910,000 to 3,06 million over the past year.

This means that almost 2 million newbies without any actual trading experience and lacking any specialized software for trading/position analysis have entered the market.

While the broker's mobile applications designed for trading are continuously updated and, in general, quite user-friendly, the position analysis, particularly when several brokers are used, could raise issues. Google Sheets using free MOEX API may become a free solution equipped with automatically downloaded asset prices and parameters.

## MOEX API in Google Spreadsheets

There are two options to be used with MOEX API:

- Formulas
- Google Apps Script

However, it appears that scripts used in free documents usually confuse people, especially if these people have some investments. People are even more confused if they do not understand the script language. That's why I would like to focus on formulas only.

General description and explanation of all the requests that you can send to MOEX API is

Ads

The advertisement is for 'Alfa Battle' (Чемпионат по Data Science). It features a large red box with the text '/2.0' and 'Alfa Battle' in white. Below this, it says 'Чемпионат по Data Science'. There is a graphic of a cube with 'Alfa' and 'Battle' on its faces. The dates '12 декабря - 29 января' are shown in the top right. At the bottom, there is a red banner with the text 'Призовой фонд 1 000 000 ₽'. Logos for 'Альфа Банк', 'Билайн', 'X5', and 'Альфа Страхование' are also present.

### Editorial Digest

We email you the best articles monthly

provided in the guidebook. However, I, for one, did not find this [guidebook](#) that easy to understand, so I had to spend quite a lot of time to cope with it. For that reason, I made a [simple Google Sheet](#) with examples I use myself.

## Trading Mode Identifier

In MOEX API a lot of things depend on Trading Mode Identifier parameter (primary\_boardID). You can look up this parameter at their website using the [search function](#).

Security code	YNDX
Full name	PLLC Yandex N.V.
Short name	PLLC Yandex N.V.
ISIN Code	NL0009805522
Issue Size	293,527,656
Face value	0.01
Face value currency	EUR
Date of listing	04.06.2014
List level	1
Qualified investors	No
Security type	Common stock
Trading Mode ID	TQBR
Lot Size in Securities, Units	1

### Trading Mode ID

You can also find this identifier using [HTTP request to API](#):

<https://iss.moex.com/iss/securities.xml?q=WRITE THE FULL INSTRUMENT NAME OR ITS PART HERE>

```

<document>
  <data id="securities">
    <rows>
      <row name="PLLC Yandex N.V. class A shs" emitent_inn="0010034514" isin="NL0009805522" secid="YNDX" primary_boardid="TQBR"/>
      <row name="YNDX-18 1.125" emitent_inn="0010034514" isin="US98474TAB35" secid="US98474TAB35" primary_boardid="RPMO"/>
    </rows>
  </data>
</document>

```

### Trading Mode ID

## Retrieve stock / bonds names at MOEX

It is really convenient that you can get the full security name. You can also get the short security name automatically.

## Google Spreadsheets

You can use numerous websites to receive prices for Russian assets, but when it comes to MOEX API relevant examples are introduced on this tab.

## Google Spreadsheets

You can receive coupon date and its value (either corporate or Federal Loan Bonds (OFZ) and Eurobonds) automatically.

The screenshot shows a Google Sheet titled "API Moscow Exchange" with the following data:

Getting the date of the next coupon and value for OFZ		
SECID	Date:	Value:
SUZ9006RMFS2	2020-08-05	38.64

Getting the next coupon date and value for a corporate bond		
SECID	Date:	Value:
RU000A1018X4	2020-06-25	32.91

The bottom of the sheet shows a tab bar with "Names", "Prices", "Dividends", and "Dividend yield". The "Dividends" tab is currently selected.

Google Spreadsheets

## Retrieve yield at MOEX

Unfortunately, you can obtain the dividend yield as of a specific date represented in a single formula only for OFZ, as they are very shortlisted. For corporate bonds, you'll have to pick them out in the script or choose the initial search position manually.

The screenshot shows a Google Sheet titled "API Moscow Exchange" with the following data:

Specific date dividend yield for OFZ		
SECID	Date:	Value:
SUZ9006RMFS2	2020-01-14	7.37

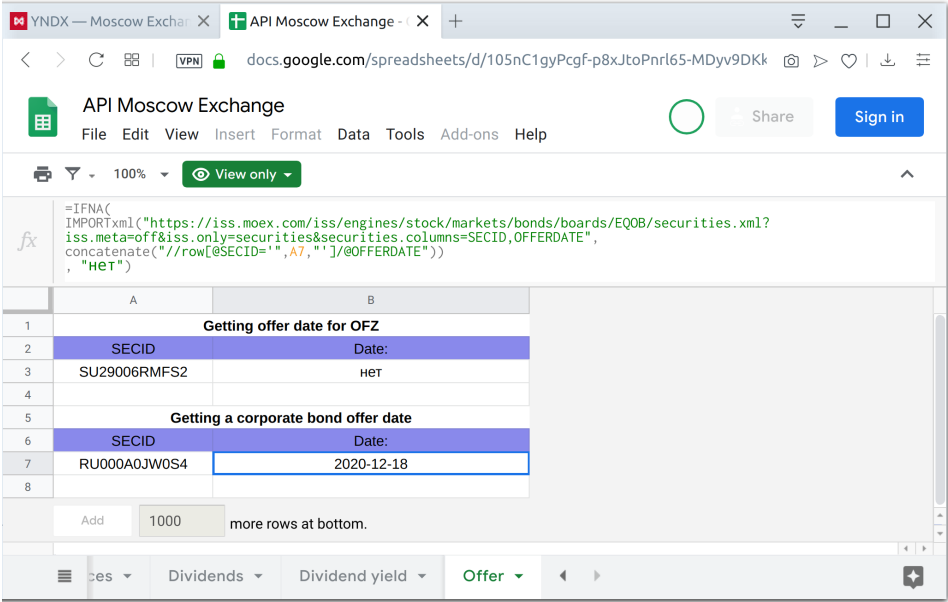

Specific date dividend yield for corporate bond		
SECID	Date:	Value:
RU000A1018X4	2020-01-15	6.64

The bottom of the sheet shows a tab bar with "Prices", "Dividends", "Dividend yield", and "Offer". The "Dividend yield" tab is currently selected.

Google Spreadsheets

## Retrieve offer dates at MOEX

Planning your own funds becomes much easier, when you receive offer dates automatically.

Google Spreadsheets

## Conclusion

MOEX API gives you powerful capabilities. In this article I described only those tools that I use as a long-term private investor.

Please note that I have no relations with Moscow Exchange and I use MOEX API only for personal needs.
