# 🔗 Full automation of a two-room apartment 🏢 using Home Assistant, MegaD-2561, Sonoff and Electrodragon

The repository presents the complete configuration of Home Assistant for all devices in the apartment.

Read this in other languages: English, Русский язык.

Automation was done using the Wifi IoT Relay Board Based on ESP8266 relay and the Sonoff Basic WiFi Wireless Switch with Tasmota firmware. Relays are installed in oversized junction boxes in the walls of the apartment. To receive data from sensors and partially to control the relay, a multifunctional MegaD-2561 controller is used.

Additional information in the articles (in Russian): first, second and third.

Current view of the Home Assistant interface:

🔊 Plan to migrate firmware ESPHome.
